

This policy covers all areas GSS work in (e.g., GSS Head office, sites across the UK), when completing HV Substation design, project management, commissioning services and site management and installation. GSS demonstrate sound Safety, Health, Environmental and Quality commitment to our employees and Clients through our UKAS accredited management system which is integrated to ISO9001, ISO14001, ISO45001 & ISO27001.

In pursuit of intentions of being an environmentally efficient company, GSS seek to maximise opportunities for implementing systems of work which can help to reduce environmental impacts, and which may provide significant environmental benefits.

The company recognises that business operations inevitably impact on the environment in a number of ways. GSS Ltd are committed to minimising the potentially harmful effects of such activity wherever and whenever possible.

It is our policy to comply with all Environmental Legislation, Acts, Regulations, Code of Practice and other guidance. We will endeavour to provide an environmentally friendly environment including, premises, use of equipment and systems of work that are as far as is reasonably practicable, safe and without risks to health

This statement provides the framework on which the environment programme is based, enabling the company to set targets and measure progress, whilst striving for continuous environmental improvement.

GSS will endeavour to:

- Minimise waste material and prevent accidental pollution and physical damage of habitats while building infrastructure.
- Manage waste packaging and engineering materials in a responsible manner
- Operate and select efficient and quiet plant that reduce energy/fuel consumption and that have minimal environmental impact.
- Make arrangements for the removal of waste material, which shall be described in the method statement for the work activities producing the waste, with a view to avoiding ill considered "dumping" of contaminated waste.
- Dispose of waste material in accordance with Client procedures, local authority requirements and in compliance with the Environmental Protection Act.
- Use only authorised suppliers for recycling and disposal of waste materials.
- Work in partnership with suppliers, customers and government agencies to help protect and improve the environment.
- Practice sustainable development and protect both our staff and the environment in which we work
- GSS is committed to achieving Net Zero emissions by 2045.

GSS ensure that other parties are aware of this policy and promote the principles of sound environmental practice.

All employees are responsible for cooperating in the implementation of this policy during business activities and design solution methods. The Environmental Representative is responsible for the company's environmental policy and performance.
